Empowering *Companies* Through Safety

CORE VALUES:

- Hassle free safety program and activity administration
- Fun, interactive, and relevant training programs
- Thorough and constructive inspections
- Reasonable and defensible safety recommendations
- Get everyone home safely every day!

FIRM INFORMATION:

Reliance Safety Consultants was founded in 2009 with the goal of assisting Companies profit while properly tending to their human resources by complying with Federal and State OSHA (Occupational Health & Safety Administration), EPA, NFPA, and other regulations.

We know personally how it feels to see loved ones injured at work. Injuries at work cause emotional and financial hardships to families, and financially impact companies by decreasing profits. We are also familiar with the complexity, stress, and time wasting that companies face while complying with

regulations such as daunting contract submittal requirements (IIPP, etc.), or responding to violations found during inspections. These personal connections fuel our passion for safety and compliance.

Our highly-experienced bilingual (Spanish) safety professionals are either authorized OSHA Instructors and/or have degrees and certifications in the Occupational Safety and Environmental field. Their experience ranges from working for Cal/OSHA and Fortune 500 companies providing consulting, training/certification, written programs, and audits/inspections with reports.

We provide services throughout California and neighboring states. We look forward to taking the hassle out of your safety programs so you can focus on what makes your company successful.
